Neve. 1643.

A

Prognostication, serving
for the yeare of our Lord God
and Saviour *Iesus Christ*,

1643.

Wherein you may observe the grounds of
the alteration and condition of the 4 Quar-
ters of this yeare: As also the disposition of the
Ayre, for each severall moneth, according to
the inclination of the Cœlestiall bodies, with
the change of the Moone, her full, and quar-
ters, and the time of the Eclipses, and other
necessary observations, convenient in such a
Worke to be noted.

Calculated, and especially referred, to
the Longitude and Elevation of the Pole
Articke of the ancient and famous
Citie of Norwich, and may
serve for all England.

Collected and published by John
Neve, Gent.

Printed at London by E. P. for the Com-
pany of the Stationers. 1643.

Certaine profitable Rules and briefe obser-
uations concerning Husbandry.

The best time to sow all kinde of corne, is when
the moone goeth her course in Cancer.

The best time to plant and graft, when the moon
is in a fixed signe, especially in Taurus or Aquarius,
and in the increase of the Moone, which is between
the change and the full.

To set and sow all kind of seedes, the moone be-
ing well seated in Aries, Taurus, Cancer, Virgo, Libra,
Capricornus, Aquarius, or Pisces.

To fell Timber to build withall, when the moon is
ward the last quarter, she being then in Aqua-

Crop trees and fell wood to burne, that the stocke
may the better and sooner grow againe, when the
moone is in the first Quarter.

Remove and set young trees, in the last Quar-
ter of the moone, in Taurus, or Capricornus, and that
the moneths of September, October, November, and
February.

The best time to geld Cattell, the moone being
in Aries, Sagittarius, or Capricornus.

The best time to cut vines is in February or March,
the moone increasing in Taurus, Virgo, or Libra.

The best time to sheare sheepe, is in the encrease
of the moone, that is, from the change to the full.

To cut haire, that it may the sooner grow againe,
the moone increasing in Taurus, Virgo, or Libra.

To mucke your Land, that the weedes may not
grow thereby, is in the decrease of the Moone, that
is, from the full to the change.

A Prognostication.

A fit time to kill fat Swine, is in the encrease nigh the full Moone, the Larder the better will endure the boyling,

Of the Eclipses which shall happen this present yeare of our Lord God, 1643, according to the most exquisite observations of the Tres-noble Tycho Brahe, and the Prutenick Tables.

Foure Eclipses shall happen this yeare, two of the Sunn and two of the Moone, the latter of the Moone shall onely be apparent in our Horizon, the other three shall present themselves in Countreys farre remote from us, which here following shall more particularly shall be expressed.

Of the first Eclipse.

The first Eclipse of the Sun shall happen and be apparent unto those people and inhabitants that dwell in the orientall parts of Asia, China, and in the Countreys of the great Cham, with the adjacent Islands, as Iaponia, Xicoca, Xima, Lequeo, Liconia, &c. Upon the 20 of March in the reformed yeare, but on the 10 of March in our Julian yeare according to our computation, the great light being at that instant consumed about the 28 degree of Pisces, nere Cauda Draconis, in a signe of the watry triplicity, naturally cold and moist, stigmaticke, Feminine, Septentrinall, Nocturnall and Common, the house by night of Iupiter, the exaltation of Venus, and the fall of Mercury: the totall duration of this obscuration, will bee three houres min. The digites of degrees eclipsed, will be about 12 degrees.

Of the second Eclipse.

Upon the 4 day of April, in the Gregorian yeare but according to our usuall account, on the 25 March shall be visibly scene unto the inhabitants that are situated toward the west from us, in Amer

Neve 1 6 4 3.

ca, Mexican, and Peruaana, a small Eclipse of the Moone, he being at that instant placed in 02 about the 13 degree of Libra, neere Caput Draconis, in a signe of the airie triplicity naturally hot and moist, sanguine and temperate, masculine, diurnall, occidentall and moveable, the House by day of Venus, the exaltation of Saturne, and the fall, of the Sun: The whole continuance of this Eclipse will bee 2 houres and 6 min, the time of incidence will be one houre and thre minutes, the points 02 degrees eclipsed will be 3. 8 and 46.

Of the third Eclipse.

There shalbe presented to the sight of the people inhabiting in the orientall parts, and in the Isles of Madagascar, Romeris, both the Iavaes, Lucach, Beach, and in the Kingdomes of Maletur, and Magellanica, another Eclipse of the Sun, on the 13 day of September in the Lillian or reformed yeare, but according to our ancient computation by the Julian yeare on the 13 of Sept. both the luminaries being at that time about the 19 degree of Virgo, neere Caput Draconis, in a signe of the earthly triplicity, naturally cold and dry. The time of incidence of this Eclipse is 1 houre 45. min. The whole continuance from the beginning to the ending, will be 3 houres and 32. min. the degrees eclipsed will be 11 and 32 min.

Of the fourth Eclipse.

Upon the 27 of September being Sunday, in the reformed yeare, but upon the 17 day of the same month here in England, according to our computation, shall apparently be seene in our Horizon a small Eclipse of the Moone, about 7 of the clocke at night, he being at that instant situated about the 4 degrees of Aries, neere Cauda Draconis, and diametrally opposite unto the Sun, in a signe of the fiery triplicity, naturally hot and dry, the time of her Eclipse from the beginning to the ending will be 2 houres 47. minutes, the points 02 degrees eclipsed will be 6, and 56 min,

A Prognostication.

Briefe Rules and necessary Observations, concerning
Bleeding, Bathing, Purging, and Sweating, ac-
cording to the motions of the Moone.

For Bleeding.

When the weather is extreme hot or cold, it is not
then convenient, either to let blood, or to purge,
unlesse some great necessity doe require it. Yet not-
withstanding, if this blood letting be for the phren-
sie, the Apoplexie, for a continuall head ach, proce-
ding of choler or blood, or any hot burning feaver, or
other extreame paine, a man in such a case may not
day for a chosen time, because the patient might mis-
carry in the meane season.

But in this aforesaid case of extremitie, blood
is not to be let in such a quantity, as otherwise it
would, if a chosen time might be expected.

The best time to let the Phlegmaticke blood, is
when the Moone is in Aries, or Sagitta, the head and
thighes excepted.

For the Melancholy, the Moone being in Libra,
or Aquarius, the buttocks and legs excepted.

For the chollerick, the moone being in Cancer
Scorpio, or Pisces, the breast and feet excepted.

For the Sanguine, all be good aforesaid.

In spring let blood on the right side.

In harvest, let blood at the left side.

For Bathing.

Bathings are commonly used rather for pleasure
then for profit, especially where hot houses are o-
ver much haunted, but I intend not to speake of
them, otherwise then to advertize those that tender
their own health, to be wary and circumspect in re-
sorting to them without cause, & immediately after,
or with such persons as be unclean. Know that it
is not good to bathe, the Moone being in earthly
signes, as in Taurus, Virgo, or Capricornus, the rea-
son is, because they are of a cold nature, and the
nature of cold, is to restrain & bind. & so the moon
being in these signes, the pores of the body are clo-
sed

led and shut, so that there can bee no resolution of humours & superfluities, which by bathing ought to be aboyded. But in fiery signes, as when the moone is in Aries; Leo or Sagittarius, then it is a good time for Bathing, for then the body is apt to resolution, it is the nature of heat to open and resolve.

It is best Bathing 2 or 3 dayes after the change, and at the full of the Moone, for then the superfluities are ripe and ready to aboyd, and disposed to flow and issue out, which indeed is the end and use of Bathing.

If any will enter into the Bath for cleannesse sake, let the Moone be in Libra, or Pisces.

Furthermoze, if bathing be used for health, let the parties grieved, learne of the wise Physicion, whether his sicknesse hath need of moistning or drying, for if it require moistning, as in Pthisis, and such like, then let him bath in watry signes, having good aspects with Iupiter or Venus. But if the sicknesse require drying, as in Paralysis, & the like, then let him bath the Moone being in fiery signes, having good aspects with Mars and the Sun.

Also before you enter into any bath, your body must be first prepared and purged, for if you goe in unprepared, peradventure you may be worse then before.

The best time of the yeere to bath in, is the Spring and Harbest, and in the moneths of May, and September.

The best time of the day to goe into the bath, is one houre after the Sun rising at the least, alwayes provided, that you walk either an houre or half an houre before, and have a good stoole either by nature or Art: you must cover your head well, so long as you be in the bath, and beware you drinke no cold drinke, although you be very thirsty, but forbear all things that be cold, last when you are hot within, cold strike suddenly into some principall

A Prognostication.

member and hurt you.

The time of tarrying in the bath, is commonly one houre, but it may be more or lesse, according to the nature of the bath, or sicknesse of the party, at the discretion of the wise Physician.

For Purging.

In purg- ing, these 5 things ought to be known	}	<ol style="list-style-type: none"> 1 The humour which aboundeth 2 The best way to aboyd it. 3 The strength of the person. 4 The maner of the sickness 5 The force & nature of the medicine.
--	---	--

For when these things are not considered and observed, many perillous accidents may follow, and greatly hurt the body.

Good signes for purging generally, are Cancer, Scorpio and Pisces: particularly, with potions or drinks, the moone being in Scorpio.

Purge with electuaries, the moon being in Cancer.

Purge with pills, the moone being in Pisces.

Take Preparatives, the moone being in Gemini, Libra, or Aquarius.

Take vomits, the moon being in Aries, Cancer, or Capricornus.

Take Glysters, the moon being in Libra, or Scorpio.

To provoke Sweatings, the moon being in Cancer, Leo, or Libra.

To stop Fluxes, Rheumes, and Laxes, the ☽ being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue Attractive, the ☽ being in Aries, Leo, or Sagittarius.

Good to comfort the vertue Digestive, the ☽ being in Gemini, Libra, or Aquarius.

Good to comfort the vertue Retentive, the ☽ being in Taurus, Virgo, or Capricornus.

Good to comfort the vertue Expulsive, the ☽ being in Cancer, Scorpio, or Pisces.

For using of Unguents or Plaisters, they are best to be applyed and used, when the ☽ is in that signe
which

which governeth the same member or part of the body, to which it is applyable.

For Sweatings.

Swettings, as they are of two sorts, that is to say, naturall and artificiall, so they are used for two ends and purposes: The naturall Sweat, if good heed be taken, in opening of the pores, will dissolve grosse and thicke humours, will cleanse the blood, comfort the spirits, put away cold, will consume raw humours, qualifie and quench raging feavers, will helpe numbnesse, and the Drop sicke. The Artificiall Sweat, will cleanse scabs, put away itch, amend dullnesse in hearing, ease the Stone, resolve congealed and cold melancholy blood and humours, but for the better performing, and effectuall working in these causes, the counsell of the learned physician is to be desired and used.

The best and meetest signes to sweat in, are Leo, Aries and Sagittarius, and that two or 3 dayes after the change, and at the full of the Moone.

And note that sweating is better to be done in the evening then in the morning, for when the body hath nourishment within, the spirits shall not be drawne forth, to the extreame parts.

Note further, that lean folks & dry or feeble persons must sweat little, for it will hurt them much: but fat folks may sweat well, and it will doe them much good.

A briefe Description of the foure Quarters of this yeere of our Lord God, 1643.

Of Winter.

Winter, (which is the chiefeſt capitall foe for the Spring, the disgrace of Summer and the deepe devourer of the fruitfull harvest) began to take his effects according to our usuall computation the 12 of Decem. in the yeere aforesaid, at the first entrance of the Sun into the first minute of the signe Capricornus, at which time the sun is at his greatest

A Prognostication.

greatest South declination from the Equinoctiall line, so that he riseth south-east, and setteth south-west. Now is the Hemall or winter solstice, for the Sun is so farre removed from our Zenith, or verticall point, that he cannot decline any further, and stands at a stop or stay, and then is the shortest day, and longest night in the peere, and so this quarter doth continue untill the 11 of March next following.

This season is by nature cold and moyst, unpleasant for the most part to travellers, either by land or sea, and unto aged persons, it is very combrous & noysome, causing superfluity of rawnesse, and abundance of cold moystnesse, to overflow their bodies, to their great trouble and disquiernesse.

The diseases ingendred of flegmatick matter, & cold humors, will this quarter afflict diverse persons, as Quotidian and putrid Agues, Coughes, Rheumes, Palsies, Hoarsenesse, Stopping in the pipes, and lunges, Crampes, numbnesse of the members, with many other diseases, apt for the condition of the quarter.

Thus will the Starres, if God assent,
Whose power alone can all prevent.

Of the Spring.

The Sun, (which is the eye of the world, the fountain of light, and chiefe moderator of all the rest of the lights) hath like a Gyant run his race, and finished his Revolution (Gradatim) throughout the 12. Agnes, and now this 11. of March, beginneth his journey afresh againe, and goeth an even course, and soe becomes an indifferent Arbitrer between the day and night, and maketh an equality throughout his whole government, to the great joy and comfort of all his revived subjects, chearing with his splendid countenance, the pooke weather-worne weeds, of this our darke Starre of mortality, (which the darkened countenance of Winters extremitie had almost subdued,) with his excellent presence, whereat the earth begins to smile, and to put on her new

apparell, the flourishing libery of fresh Flora.

This season is by nature hot and moist, the most temperate time of the yeere, and the least breeder of sickness, that both procure death, and a very convenient time for the removing of sicknesses, and griefes gotten before, and also to avoid and prevent those that are to come: for now the dull senses and spirits of man and other creatures, are quickned and rebibed, and therefore the humours which doe abound, and are readiest to repress nature, are fit to be emptied and avoided, whether by blood letting, purging, or otherwise, as the learned Physician shall advise, and as the cause of the disease shall require: such therefore as be diseased, let them not neglect this time.

Many sorts of sicknesses, and deadly maladies are threatened this Quarter, many double fevers, paines in the head and eyes, bleeding at the Nose, small Poxes, measles, itching, tetter, Byles, and swelling in divers parts of the body, Jaundies, obstructions in the liver, with much corruption of blood.

Infections from the Starres may fall,
But One above doth stay them all.

Of Summer.

Summer, the third part of our vulgar yeere, according to our usuall computation: Now when the Sun hath fully determined the Spring, with his last Grade of Gemini, and hath moved in his motion to the highest point of his course, namely to the first degree of Cancer, which shall be this yeere, the 12. of June. Now is the second Solstice of the yeere, called the Equinox or Summer Solstice, for even as the Sunne when hee entreteth into Capricorne, hath his greatest South declination from the Equinoctiall line: So now at his ingresse into the beginning of Cancer, he hath his greatest declination towards the North, from the said Equinoctiall line,
and

A Prognostication.

and even then as at the time of Winters Solstice, hee was so farre removed from our Verticall point, that hee could not move no further towards the South, and was therefore to approach again towards our North Latitude. At which time he seemeth to stand, so now being come so neere our Zenith that hee cannot remove no further towards the North, and is therefore to reuert againe to the South Latitude. At his first going from us, he seemeth also to stand, insomuch, that even as before at his returne towards us againe, hee made with us the shortest day and longest night in the yeer, so now at his returne from us, he maketh with us contrariwise, the longest day and shortest night in the year: and afterwards declineth more and more from us, like as before he moved more towards us.

This season according to his proper nature is hot & dry, turning the humors of mens bodies into hotnesse & drynesse, resembling the element of fire and complexion of choler, bringing all fruits to their ripenesse, & a tell to their fatnesse & men to their wealth.

The Infirmities of this Quarter are likely to be hot burning feavers, diverse inflammations of the liver, and other parts, plurisies, Phrenies, Head-ach, and immoderate sweats, hot Spothumes, and such like, which may proceed from corruption of blood and choler.

Though stars incline to worke us ill,
All shall be as the Maker will,

Of Autumne.

Autumne, according to our accustomed computation, the last quarter of this yeare, beginneth at the Suns departure from the last scruple of Virgo, into the first degree of the second equinoctiall Sign, Libra, the which will be this yeare on the thirteenth day of

Sept

September, the day and night being of an equall length as in the spring, at which time is the Autumnall Equinoctiall, for even as at the Sunnes entrance into Aries, the day by day encreasing from the winter solstice, till then, came to be equall with the night, going on still more & more till the Summer Solstice, when was the longest day, & shortest night: so now the night by increasing from the Equinoctiall Solstice to the Sunns ingredience into Libra, hath got to be equall with the day, and shall encrease more and more, till the Brumall Solstice come againe, when the night is longest and the day shortest.

This time of the yeare is of it selfe unconstant and variable, warm in the day time, and cold in the night. This quarter, because of the inequality of temperature, may as Hippocrates saith, be called the mother or nurse of deadly sicknesses, and as Galen saith, that this time of the yeare is very dangerous for taking of sicknesses.

The bodily diseases, whereunto mans frailty is subject unto this quarter, are many oppilations of the spleene, obstructions in the liver, Quartane feavers, Blaque Jaundies, Hemeroids, Droples, Gouts, Consumptions, and many other Diseases, which may proceed of flegme and melancholy.

Thus every Planet in his kind,
Is to performe the Almightyes mind.

A declaration of the inclination and disposition of the Winds and weather, according to the divers motions and influences of the erraticall and fixed Starres: with the day, houre, and minute of the change of the Moon, her full and quarters; and also of the rising and setting of the Sun, in every 7 day of every moneth of this present yeare of our Lord God, 1643.

A Prognostication.

Of Ianuary.

Day.	The Sun riseth	The Sun setteth,
1	hou. 8. and 3 min.	hou. 3 and 57 min.
7	hou. 7. and 56 min.	hou. 4 and 4 min.
14	hou. 7. and 46 min.	hou. 4 and 14 min.
21	hou. 7. and 34 min.	hou. 4 and 26 min.
28	hou. 7. and 23 min.	hou. 4 and 37 min.

Last Quarter the 3. day, about 6 of the clock in the morning, frosty and cold.

New Moon the 10. day about 6 of the clocke in the morning, winterly weather.

First quarter the 16. day, 42 min. after 10 of the clock at night cloudy and unconstant.

Full Moon the 24 day, about 9 of the clock at night, windy and temperate.

Ianuarie abstract.

In this moneth let not blood, neither use but little physicke, except great necessity constraines thee, and beware of taking cold, for in this moneth Rheumes & flegme doe much increase: to fast long is hurtfull, but to drinke white wine fasting, is good & wholelome, use meates that are naturally hot, moderately, and weare warme cloathes.

In worldey busines this moneth, you may set all kind of common fruit trees, or plants, as Peares, Plum, Cherry, Filbert, Walnut, & such like. Hawthorne, & all sorts of quicksetts trees or plants, are fittest to be generally set, fro h change to h 1 Quar.

Take away molle & superfluous branches from your trees: & this moneth is good to set Beanes, Pease, Parsnips, Radish, Leeks, Garlick, Turneps & Onions, if the weather be mild, & the Moon past the full, you may begin to graft at the end of this moneth, so as the Moone be increasing in her light. Good husbands also this moneth crop their trees, sell timber, & geld Cattle, such as are to be gelded, the state of the Moone alwayes considered.

Neve 1643.

Of Februarie

Day.	The Sun riseth	The Sun setteth.
1	hou 7. and 13. min.	hou 4. and 47 min.
7	hou 7. and 4. min.	hou. 4. and 56 min.
14	hou. 6. and 50. min	hou. 5. and 10 min.
21	hou. 6. and 34. min	hou 5. and 26. min.
28	hou. 6. and 22. min	hou 5. and 38. min.

Last quarter the 1 day, 44 min. after 10. of the
clocke at night, inclined to moyſſure.

New moone the 8 day, about 4 of the clocke in
the afternoone, frosty and cold.

first Quarter the 15. day 31 min. after high
noone, unconstant weather.

full Moone the 23 day, 40 min. after 3 of the
clocke in the afternoone winterly weather.

Februaries Abstract.

In this moneth, all stimy ſh, milke, & Rice, and
such like that doe oppilate or stop the liver & veines,
or thicken the blood, are to be eschewed, as enemies
to health, & also yet forbear physicke and letting of
blood, except necessity doe urge, & learned counsell
doe advise you, beware now of taking cold, for now
are Agues apt to be taken, & it is very ill to take
heates, and afterwards sodaine cold upon them.

Now is the most apt time to graft or plant, & to
set all kind of trees & bushes, the wind and weather,
& age of the Moone considered: Pease, Beanes, Ha-
stings, Onyons, Parsnips, & such like, as in January,
may very fitly be set, in the wane of the Moone.

The time is now to trim up Gardens, to set and
sow all kinde of kitchin hearbes, to set slips, sow
kernels, mustard-seeds, oates, set hops, cut vines,
& proine them, sticke up your rouncell pease, and
hastings.

Of

A Prognostication.

OF March.

Day.	The Sun riseth	The Sun setteth.
1.	hou. 6. and 20 min.	hou. 5. and 40 min.
7.	hou. 6. and 8 min.	hou. 5. and 52 min.
14.	hou. 5. and 54 min.	hou. 6. and 6 min.
21.	hou. 5. and 40 min.	hou. 6. and 20 min.
28.	hou. 5. and 16 min.	hou. 6. and 44 min.

First quarter the 3 Day, 33 min. after 10 of the clocke in the forenoone, Windy and stormy.

New Moone the 10 Day 45 min. after one of the clocke in the morning, Windy and distemperate.

First quarter the 17 Day 22 min. after 4 of the clock in the morning, Windy with ratne.

Full Moone the 25 Day 41 mi. after 8 of the clocke in the morning, fitting the season.

Marches abstract.

In this moneth the humours of mans body begin to increase: and now grosse feeding, breedeth grosse blood and grosse humours, and therefore use meates of good digestion, and such as breed good juice; it is a good time to purge and to clarifie the blood, by Portions, Washings, and blood letting, or such other wayes, as the learned Physitian shall appoint, and the cause of the disease shall require; also sweet meates and drinckes are commendable.

The time of grafting as yet indureth, together with setting, sowing, prorning, & plashing of vines, and Hops, Willow, Oats, Pease, Onyons, Parsenips, and such like.

Of Aprill.

Day.	The Sun riseth	The Sun setteth
1	hou. 5. and 18 min.	hou. 6. and 42 min.
7	hou. 5. and 6 min.	hou. 6. and 54 min.
14	hou. 4. and 54 min.	hou. 7. and 6 min.
21	hou. 4. and 39 min.	hou. 7. and 21 min.
28	hou. 4. and 29 min.	hou. 7. and 31 min.

Last quarter the 1 Day 47 min. after 6 of the clocke at night, overcasting clouds for ratne.

Item

Neve 1643.

New Moon the 8 day, 21 min. after 11 of the clock in the forenoone, apt for the season.

First Quarter the 15 day, 35 min. after 9 of the clocke at night, reasonable temperate.

Full Moone the 23 day, 48 min. after 10 of the clocke at night, some Aprill Showers.

Aprills Abstract:

In this moneth of Aprill, the pores of mans body are opened, and are apt to receive Physick, and they that refuse the same now, I commit them to the benest of Nature, for of all times of the yeare, this is the best time to prevent causes of sicknesses, or for speedy remedy in extremities, for now nature doth renew her strength through all the body: for where sickness happeneth, she soone unburdeneth by the meanes of Physicke: wherefore what it cannot doe now, will hardly be done hereafter, therefore take time while time is, &c.

As yet you may graft, and prope vines, and also set melons, Cucumberis, Citrons, Martichokes, and Pole Hops, some Barley, Tanners apply themselves in barking of Trees.

Of May.

Day.	The Sun riseth	The Sun setteth.
1	hou 4. and 23. min	hou 7. and 37 min.
7	hou 4. and 15. min.	hou 7. and 45 min.
14	hou 4. and 5. min	hou 7. and 55 min.
21	hou 3. and 56. min	hou 8. and 4. min.
28	hou 3. and 50. min	hou 8. and 10 min.

Last Quarter the first day, 13 min. before one of the clocke in the morning, apt for the season.

New moon the 7 day 30 min. after 9 of the clocke at night, a cloudy and moist change.

First Quarter the 15. day 33 min. after 3 of the clock in the afternoone, some overcasting clouds.

Full Moone the 23 day, about 10 of the clocke in the forenoone, faire and pleasant weather.

Last quarter the 30. day about 6. a clocke in the morning, some overcasting clouds.

A Prognostication.

Mayes Abstract.

In this moneth rise early, for May doth not lobe any fluggarbs, and let such as be in health, and able, walke into the fields, and eate and drinke betimes, it is good and wholesome; abstaine from all meates of a hot nature: for such as be sicke, it is a very goodtime of the yeere to be let blood, or take phisick. Such as be whole, God keepe them in health: and such as be sicke, God send them good Physitians.

The time is now sitting to sow Vazill, Marle-rome, and such fine seed, as before might not be sown, because of the coldnesse of the weather: set sage according to the Proverb, set sage in May, and it will last alway: sow flax and Hempe, set Martichokes, weede your Hops and Gardens, see to your grafts that no superfluous branches trouble them. Mayadew, Rosemary flowers, and Beane-flowers, may at your pleasure be distilled this moneth; and now also have a care of watching your Bees.

Of Iune.

Day.	The Sun riseth	The Sun setteth
1	hou. 3. and 49 min.	hou. 8. and 11 min.
7	hou. 3. and 46 min.	hou. 8. and 14 min.
14	hou. 3. and 47 min.	hou. 8. and 13 min.
21	hou. 3. and 49 min.	hou. 8. and 11 min.
28	hou. 3. and 52 min.	hou. 8. and 18 min.

New Moone the 6. day 20. min. after 8. of the clocke in the morning, somewhat windy.

First quarter the 14. day about 9. of the clocke in the morning, somewhat windy.

Full Moone 21. day 10. min. after 7. of the clocke at night, reasonable temperate.

Last quarter the 28. day 22. min. after 11. of the clocke in the forenoone, faire hot weather.

Iunes Abstract.

In this moneth, if thou must needs use Physick take it early in the morning, that it may have wrought before the heat of the day, and use a light and

Neve 1643.

and thin diet, for the Stomack is not so able to digest
as in Winter, and in some of the former moneths,
and its very good and convenient for some to drinke
clarified whey boyled with cold hearbes, and to ab-
staine from violent exercise.

Distilling of roses, making of Syrups and conserues,
are now in prim, now gather such hearbs as you mean
to keepe all the yeere, but be sure to drye them in the
shade. Good husbando and huswibes are now wea-
ding their Cozne and Gardens, and others hearing
their Sheepe, the time serues to set Rosemary, and
Gilliflowers, take heed of cutting hedge, or trees, or
hearbs, with knife, but rather gather them with
your fingers, now you may set Saffron, carry out
compost, make Hay, rid Gardens of Snakes, Wnts,
or Pissantes.

Of July.

Day.	The Sun riseth	The Sun setteth
1	hou. 3. and 54 min.	hou. 8. and 6 min.
7	hou. 3. and 59 min.	hou. 8. and 1 min.
14	hou. 4. and 7 min.	hou. 7. and 53 min.
21	hou. 4. and 10 min.	hou. 7. and 40 min.
28	hou. 4. and 30 min.	hou. 7. and 30 min.

New Moone the 5. day 51. min. after 8. of the
clocke at night, some overcasting clouds for raine.

First quarter the 14. day about one of the clocke in
the morning, inclined to moysture.

Full Moone the 21. day about 3. of the clocke in
the morning, faire and pleasant weather.

Last quarter the 27. day 22. min. after 6. of the clock
in the evening, setting the season.

Iulies Abstract.

In this moneth use cold hearbs, and cold meates,
abstaine from phisicke, and now the rivers are more
wholesome then the Bathes, let the Sun be up be-
fore you walke abroad, in the time of any Plague or
pestilence, keepe your Chamber windowes shut, ope-
ning them when the Sun hath force of shining, and

A Prognostication.

be sure to perfume your Chambers every morning with Tar, put on a Chaffingdish of Coales, then which nothing is better, and use Carduus Benedictus boyled and drunke fasting.

May harvest now calleth slacke husbands to worke, & such as have leasure, it is good to fallow for wheat, and to carry out soyle, and to gather seedes, and flowers, to keepe all the yeare, and to dry them in the shade, till they be almost dry, and then set them a while in the Sun, and in like manner you may use your hearbs.

Of August.

Day.	The Sun riseth	The Sun setteeth
1	hou. 4. and 36 min.	hou 7. and 24 min.
7	hou. 4. and 48 min.	hou 7. and 12 min.
14	hou. 5. and 0 min.	hou. 7. and 0 min.
21	hou 5. and 16 min.	hou 6. and 44 min.
28	hou 5. and 27 min.	hou 6. and 33 min.

New moone the 4. day 36. min. after 11. of the clocke in the forenoone, soultrey hot weather.

First quarter the 12. day about 3. of the clocke in the afternoone, apt for moisture.

Full Moone the 19. day 41. min. after 10. of the clocke in the forenoone, some shewes.

Last quarter the 26. day about 4. of the clocke in the morning, fitting the season.

Augusts Abstract.

In August moderate dyet is good phisicke, for now it is very dangerous to surfeit, and to take heed of heats, & then of colds for nothing sooner ingendreth Plurisies, and use not to sleepe much especially in the afternoone, for making opilations, and for aboyding of Agues, and the head-ach and catharres.

And now let a man abstaine from phisicke, except great necessity doe compell him thereunto.

Now

Neve I 643.

Now Lady Ceres looks to have men enough to attend her: They that would have good seeds for the Gardens the next yeare, must now gather of their owne, lest in buying they lose their labour and their mony: and such as desire to have lettuce, or other hearbs for Winter, may sow seeds in the increase of the Moone.

Of September.

Day,	The Sun riseth	The Sun setteth
1	hou 5. and 34 min.	hou 6. and 16 min.
7	hou. 5 and 46 min.	hou. 6. and 14 min.
14	hou. 2. and 2 min.	hou 5 and 58 min.
21	hou 6. and 14 min.	hou. 5. and 46 min.
28	hou. 6. and 18 min.	hou. 5. and 32 min.

New Moone the 3. day about 4. of the clocke in the morning, reasonable temperate.

first quarter the 11. day about 4. of the clocke in the morning, some windy and stormy weather.

Full Moone the 17. day about 7. of the clocke at night, stormy showers.

Last quarter 24. day 50. min. after 4. of the clock in the afternoone, some fall of moisture.

Septembers Abstract.

In this moneth, such as have need may safely take physicke, and also bath. and bleed, in this moneth all things are in their proper nature, and vertue, and such fruits as are ripe and not infected, are good to eat, for such as have good stomacks. The time is good to make conserves of Barberries and Quinces, Winter hearbs may now be sowne, likewise is the time to set Hartichokes, Rose-trees, Apple-trees, Gardens. Draw-buries, Violets, Gilly-flowers. Apples are to be gathered in the full of the Moone: sow Parsnips, and in dry weather gather your Hops.

A Prognostication.

Good husbandry is sowing of Rye and wheat,
Good housewifery is making of vertuce, and pluck-
ing of Hemp.

Of October.

Day.	The Sun riseth	The Sun setteth.
1.	hou. 7. and 34 min.	hou. 5. and 26 min.
7.	hou. 7. and 46 min.	hou. 5. and 14 min.
14.	hou. 7. and 0 min.	hou. 5. and 0 min.
21.	hou. 8. and 15 min.	hou. 4. and 45 min.
28.	hou. 8. and 26 min.	hou. 4. and 34 min.

New Moone the 2 day, 20 min. after 9, of the
clocke at night, inclined to windy weather.

First quarter the 10 day 44 min. after high noone,
cloudy and windy.

Ful Moone the 17 day 38 mi. after 4 of the clocke
in the morning, cloudy and unconstant.

Last quarter the 24 day, 55 min. after 9 of the
clocke in the forenoone, apt for the season.

Octobers Abstract.

In this moneth thou mayst take Physicke, and al-
so Bathe if occasion serve, use hot meats and drinks,
and use good wholesome wines to nourish good
blood, and be ware of taking cold, because the quar-
tane Ague will be Apt to be taken, and such other ill
diseases.

Remove young trees, as Apples, Peares, Quin-
ces, Roses, &c. Set Pease, Parsenips, &c. Good
Husbands need not be hastied to sowing of wheat
for Peonies and Filberds, and be doing of such good
Husbandry.

Of November.

Day	The Sun riseth	The Sun setteth,
1	hou. 7. and 33 min.	hou. 4. and 27 min.
7	hou. 7. and 42 min.	hou. 4. and 18 min.
14	hou. 7. and 52 min.	hou. 4. and 8 min.
21	hou. 8. and 3 min.	hou. 3. and 57 min.
28	hou. 8. and 9 min.	hou. 3. and 51 min.

New Moone the 1. day 21 min. after 2 of the clock

Neve 1643.

In the afternoone, some fall of moyſſure.

first quarter the 8. day, 36 min. after 9 of the clock
at night, frosty and cold weather.

full Moone the 15 day, about 4 of the clock in
the afternoone, winterly weather.

last Quarter the 23. day, 43 min. after 6 of the clock
in the morning, cloudy and unconstant.

Novembers Abstract.

In November, finish the **Whiffles** that you meane
to take, and rest till March, except some necessity doe
constraine you, use good meates and wholesome
drinke to nourish thy blood, provide thee warm cloa-
thing, and goe dry of thy feet, or else make sure ac-
count of Rheume, and poxe, besides some other in-
convenience that will ensue.

Beware of the hot House this moneth, and use
Bettony and Cinamon in drinke.

In the new of the moone, you may remove young
trees, as in the last moneth, and set Crab-trees
to graft on when you please. It is a good
time in the wane of the Moone to set Pease, beanes,
and if the weather be not too hard, it is good sowing
parsenips, good making of Mault, and killing
Beeves and Swine.

Of December.

The Sun riseth	The Sun setteth.
hou. 8. and 12 min.	houres 3 and 48 min.
hou. 8. and 14 min.	houres 3 and 46 min.
hou. 8. and 15 min.	houres 3 and 45 min.
hou. 8. and 12 min.	houres 3 and 48 min.
hou. 8. and 7 min.	houres 3 and 53 min.

New Moone the 1 day, about 6 of the clocke in the
morning, winterly weather.

first Quarter the 8 day, about 6 of the clocke in
morning, some windy moyſſure.

full Moone the 15 day, 49 min. after 5 of the
clock in the morning, some snow or rain.

last Quarter the 23 day, 44 min after 4 of the
clock

A Prognostication.

clocke in the morning, inclined to frosts.

New Moone the 30 day, about 8 of the clocke at night, cold and cloudy weather.

Decembers Abstract.

In this moneth of December, keepe thy body and head from cold, and eat such meates as bee of a hot quality, abstaine from Physicke, and let thy Kitchin be thy Apothecary, warme cloathing thy nurse, merry company thy keepers, and good hospitalitie thy exercise.

Remove Trees and Bushes, if the Weather prove not too extreame. In the wane of the Moone set Beanes, Pease, and those hearbs that cannot endure the cold, cover them with straw from the frost and Snow.

Soli Sapienti Deo, Sola Gloria.

FINIS.
